---

Our modeling efforts have led us to need the data used in the Lockey et al. (1984) publication.

This is what we need:

ID number (same as that in final UC report)

x-ray date (for the 1984 publication)

Health outcome for each worker in the 1984 publication (comparable to the health outcomes in the final UC report - discrete, diffuse, interstitial)

We can use the Asbestos Other in the final UC report.
